PROFESSIONAL SUMMARY

Detail-oriented **QA Engineer** with **2+ years** of experience ensuring **software quality** across web applications and internal platforms. Skilled in **functional**, **regression**, **integration**, and **API testing**, with a strong ability to identify **critical defects** early in the development cycle. Hands-on experience testing **full-stack web applications** (**Java, PHP, SQL, HTML/CSS/JS**) and **proprietary SaaS platforms** used in **US-market operations**. Committed to bridging **business requirements** and **technical execution** to deliver reliable, high-quality products in **Agile environments**.

SKILLS

Testing & QA: Manual Testing, Functional Testing, Regression Testing, System Testing, Integration Testing, UAT, API Testing, Performance Testing, Test Planning & Execution, Test Case Design, Defect Management, Test Reporting

Tools & Platforms: Postman, Selenium, JIRA, Azure DevOps, GitHub, Excel, PowerPoint

Programming & Technologies: Java, SQL, PHP, HTML, CSS, JavaScript

Core Strengths: Analytical Thinking, Requirement Analysis, Cross-functional Collaboration, Attention to Detail, Stakeholder Communication, Agile/Scrum Methodology

WORK EXPERIENCE

Software QA Engineer

Wynisco | Baner, Pune *Jun 2025 – Dec 2025*

Performed quality assurance on Wynisco's proprietary internal recruitment management platform - a business-critical SaaS tool used daily by recruiters, placement consultants, and operations staff to manage US-market candidate pipelines, interview scheduling, placement tracking, and reporting.

- Performed **end-to-end manual testing** of Wynisco's **proprietary recruitment platform** covering job placement tracking, interview scheduling workflows, and placement status dashboards.
- Designed and executed detailed test cases for **functional, regression, integration, and UAT testing** across candidate management, recruiter dashboards, and reporting modules.
- Conducted **API testing** using **Postman** to validate data flow between candidate placement status updates, and backend services ensuring accuracy across all endpoints.
- Validated **multi-role user flows** (candidates, admins, and managers) to ensure **role-based access controls** and permission boundaries functioned correctly across all platform views.
- Tested **data integrity** across sensitive candidate records - verifying resume uploads, contact details, interview feedback, and placement history reflected accurately across all modules.
- Logged, tracked, and verified defect resolution using **Azure DevOps**, maintaining detailed defect lifecycle reports and ensuring **zero critical bugs** reached production.
- Participated in **requirement review sessions** with stakeholders and business analysts to clarify acceptance criteria, reduce ambiguity, and minimize rework.
- Identified and reported **30+ bugs** across core modules during UAT, contributing to a stable, production-ready release of the platform's updated placement tracking feature.

QA Engineer

RBIS Technology Pvt Ltd | Kothrud, Pune *Aug 2024 – Mar 2025*

- Tested a full-stack web application built on Java and PHP backend with SQL databases and frontend technologies (HTML, CSS, JavaScript), covering end-to-end functional flows, data validation, and UI consistency across modules.
- Led quality assurance efforts by developing comprehensive **test plans** and test cases, reducing defects across **API, UI, and performance testing**.
- Collaborated with business analysts during **requirement reviews** to clarify needs, minimize rework, and resolve issues efficiently.
- Performed **end-to-end testing** (API, UI, and performance) to improve overall system performance and reliability.

- Used **Azure DevOps** to track and manage the full bug lifecycle, ensuring timely resolution across development and QA teams.
- Supported both front-end and back-end development teams to enhance website speed and overall system performance.

QA Testing Trainee Engineer

Worldline | Pune *Sept 2023 – Mar 2024*

Completed a QA-focused trainee program at Worldline, a global leader in payment processing and fintech solutions, gaining foundational knowledge of software testing methodologies and quality assurance practices applied in enterprise-grade payment systems.

- Learned and applied core QA concepts including **test planning, test case design, defect lifecycle management**, and various testing types (functional, regression, integration, UAT).
- Gained theoretical understanding of **API testing** and **UI testing** practices used in enterprise payment processing platforms.
- Studied QA processes and workflows followed in **Agile environments** within a large-scale fintech organization.
- Developed foundational knowledge of **payment domain** terminology, transaction flows, and quality standards applied in banking and financial software.

Web Development Intern

Mael India Pvt Ltd | Pune *Jan 2023 – Jul 2023*

- Built 5+ responsive web applications using **HTML, CSS, and JavaScript**.
- Reduced page load times by **15%** through code optimization.
- Contributed to live projects and created progress reports.

PROJECTS

Lister – E-commerce Platform

- Designed and executed test plans for **functional, regression, integration, and UAT testing**.
- Worked with business analysts to clarify requirements and improve documentation through review sessions.
- Performed end-to-end **API and UI testing**; managed full defect lifecycle using **Azure DevOps**.
- Collaborated with developers, product managers, and cross-functional teams to ensure smooth delivery.

Tools: Postman, Azure DevOps, JIRA

Kaizen – for L&T company

- Kaizens are displayed to people who have the authority.
- Manually tested the application by creating a test plan
- Created the test cases based on requirements and executed them to ensure the application's functionality

HuntScalar – Student Assessment & Hiring Platform

- Created detailed test plans and test cases for each module covering **functional testing and UAT**.
- Performed manual testing to ensure application quality and tracked bugs using **Azure DevOps**.

Tools: Azure DevOps, Manual Testing

E-commerce Product Price Comparison System

- Developed front-end interface using **HTML, CSS, and JavaScript**.
- Integrated **APIs** from international e-commerce platforms for real-time data collection and implemented **ML models** in Python to fetch, analyze, and compare product pricing data.

Tools: Python, JavaScript, REST APIs

EDUCATION

BE in Computer Science (GPA: 8.2/10) *Jun 2020 – Jun 2023*

Savitribai Phule Pune University, Pune

Diploma in Computer Science (88%) *Jun 2020*

MSBTE, Pune

CERTIFICATIONS & ACHIEVEMENTS

- Participated in **TestFlix** – World's Leading Virtual Software Testing Conference.
- Presented papers in state-level technical competitions.
