Vaibhav Bhosale

Phone: +91-**9152505652** LinkedIn: www.linkedin.com/in/vaibhav-v-bhosale E-mail: bhosale.vaibhav2201@gmail.com

Professional Summary:

Software Test Engineer with 4.2 years of hands-on experience in Manual Testing and Quality Assurance across Linux, macOS, and Windows environments. Strong expertise in Software Testing Life Cycle (STLC), test case design, defect lifecycle management, and cross-platform validation. Experienced in validating complex application logic and algorithm behavior through structured testing techniques such as Boundary Value Analysis, Equivalence Partitioning, Decision Table Testing, and State Transition Testing. Skilled in functional, regression, integration, and end-to-end testing with strong experience in defect triage, root cause analysis, log validation, and collaboration within Agile development environments to ensure high-quality product releases.

Technical Skills:

• Testing Methodologies
STLC, Test Planning, Test Case Design, Test Scenario Creation, Test Execution
• Testing Techniques
Boundary Value Analysis, Equivalence Partitioning, Decision Table Testing, State Transition Testing, Edge Case Testing, Error Guessing
• Test Types
Functional Testing, Regression Testing, Integration Testing, End-to-End Testing, Performance & Stress Testing
• Tools & Technologies
Bugzilla, Jira, Redmine, Git, GitHub, Docker, VirtualBox, VMware
• Programming & Scripting
C, C++, Java, SQL, Python, Bash
• Database Validation
MySQL, MS SQL, Sqlite3
• Platforms
Linux, MacOS, Windows
• Other Skills
Defect Tracking, Root Cause Analysis, Test Data Preparation, Log Analysis, Cross-Platform Testing

Work Experience:

Junior QA Executive
Microworld Software Service (Escan Antivirus) | Feb 2022 – Present

• Designed and executed 500+ manual test cases for security software across Linux, macOS, and Windows builds.
• Performed functional, regression, integration, and end-to-end testing during multiple product release cycles.
• Validated algorithm-based security detection logic and ensured accurate behavior across different system scenarios.
• Executed edge case and complex scenario testing to verify feature stability and system reliability.
• Identified and reported 150+ defects using Bugzilla and Jira and collaborated with developers for resolution.
• Conducted log analysis and root cause investigation to assist development teams during defect triage.
• Created detailed test plans, test cases, and test documentation aligned with Agile sprint cycles.

Network Operation Engineer
Delix Net Solutions Pvt Ltd | May 2021 - December 2021

• Monitored network infrastructure to maintain system uptime and performance stability.
• Provided L1/L2 technical support and troubleshooting for enterprise network environments.
• Configured routers, VLANs, and firewall policies to ensure secure network operations.

Education:

Bachelor of Engineering in Information Technology, Mumbai, India **Aug 2019 – May 2022**
Diploma in Information Technology, Mumbai, India **Oct 2015 – May 2019**
