Reading Comprehension (Q71-75)

Direction: Read the passage carefully and answer Q71-75.

Small and Medium Enterprises (SMEs) are the backbone of the Indian economy, contributing nearly 30% to GDP and employing over 110 million people. Access to formal credit has historically been a challenge for these businesses. Banks often consider SMEs high-risk borrowers due to limited financial documentation and collateral. The government has taken several initiatives to address this gap. The MUDRA scheme provides collateral-free loans up to Rs.10 lakh for micro and small enterprises. The Credit Guarantee Fund Trust for Micro and Small Enterprises (CGTMSE) enables banks to provide credit

without collateral by providing a guarantee cover. The government's Trade Receivables Discounting System (TReDS) helps SMEs receive early payment on their invoices, improving cash flow.
